Execute and Achieve Academic Goals

Aligning Academics applies the leadership principles learned during the *Leader in Me* Level 1 to the process of aligning academics to the Core Paradigms of *Leader in Me.* The workshop focuses on setting and achieving goals—both personal and academic—and introduces a key empowerment tool: the Leadership Notebook.

Building on the foundation of leadership skills and culture taking shape in the school, this full-day workshop prepares the full staff to enable students to lead their own learning by engaging principles of empowerment and motivation and the power of achieving goals. This day is all about bringing leadership principles to bear on what many schools report as their number-one need: academic achievement.

During the workshop, participants will be introduced to the *4 Disciplines of Execution,* applying it to personal and classroom goals, as well as helping students set their own Wildly Important Goals. Staff will learn how to create and effectively use Leadership Notebooks and Student-Led Conferences to further enhance and empower students to set, track, and achieve their goals, advancing their own leadership learning in school and in life. This powerful day ends with time for *Leader in Me* Level 2 implementation planning.
