Empowering Instruction

Empower students to lead their own learning and engage in higher-order thinking through key Paradigm Shifts and progressive instructional methods.

Outcomes

At the end of the workshop, participants will be able to:

- View the role of the teacher from a different paradigm.
- Understand and meet the needs of the whole child.
- Bolster engagement through effective student collaboration.
- Provide more and better opportunities for student-led learning.
- Enhance the planning-and-reflection system of instruction.

The Empowerment Triad

A student-led environment is created when the teacher and students establish a balanced partnership of learning called the Empowerment Triad. When all elements of the triad are in place, students are safe, prepared to learn, and develop skills needed to take responsibility for their own learning.

This includes:

- **Building trusting relationships.** Students learn to trust the teacher and each other to take academic risks.
- **Activating student-led learning.** Students draw from the 7 Habits® to achieve interdependence.
- **Engaging in planning and reflection.** Teachers select learning tasks that encourage active student engagement.
The 3i Approach to Learning

Unlike the gradual release model “I do, we do, you do,” the 3i Approach is a more hands-on learning experience that naturally activates complex thought processes (i.e., Bloom’s Taxonomy). The collaborative approach engages students with 21st-century skills and dramatically reduces behavioral issues in the classroom.

• Model curiosity through questioning, narrative, news, and/or video.
• Co-create the learning task with students including time, supplies, and expected results.
• Encourage risk by vocalizing how errors are expected and are part of the learning process.

Empowering Instruction Strategies

Below is a list of effective instructional strategies highlighted during the workshop.

- Student-Engaged Assessment
- Feedback
- Collaborative Learning
- Questions
- Learning Targets
- Genius Hour
- Brain-Based Learning
- Quality Tools
- Teach to Learn
- Problem-Based Learning
- Digital Learning
- Relationship Building

One-Day Agenda | All Staff Invited

Note: Please consider additional time for lunch and breaks.
