

Workshop Overview

Emerging Stronger

We are living in a time of disruptive change, and the coming school year will require a great deal of adaptation for staff and students. This workshop will help educators develop the skills to understand and respond to change in ways that promote their own wellness and that of their students.

“Our most difficult experiences become the crucibles that forge our character and develop the internal powers, the freedom to handle difficult circumstances in the future and to inspire others to do so as well.” - Stephen R. Covey

END IN MIND

We will be able to emerge stronger in the new school year by exercising agency as we navigate change.
