Eve Miller

Director of Research for FranklinCovey
Education

Dr. Eve Miller has been the Director of Research for FranklinCovey Education for six years, in which time she led the development of a system for measuring schoolwide SEL, assisted major universities conducting studies demonstrating the impact of the Leader in Me, and designed an equity-focused professional development training for teachers.

Eve is an experienced cognitive neuroscientist with fifteen years of applied work in the genetics, healthcare, military intelligence, and education fields. She has trained in a variety of research methods, from brain imaging to behavioral assessment. Eve's PhD. in cognitive neuroscience is from the University of Utah where she did most of her academic research on the environmental factors that play a role in cognitive performance. Eve's applied work in education grew from her doctoral research exploring how learning environments can be altered to improve learning outcomes for a broader range of learners.

Eve's experience in the field of education involves teaching as well. She is an adjunct professor at the University of Utah where she has taught six different courses within the Psychology Department; Research Methods, Statistics for Psychology, Cognitive Psychology, Cognitive Neuroscience, Sensation and Perception, and Cognition in the Wild. She loves teaching and considers each assignment a new opportunity to introduce growing minds to the exciting worlds within research and psychology.
